

November 2020 NEWSLETTER

Please remember to sanitize your child's hands as well as your own when you arrive in the morning, this is our first line of defense.

For any of you who haven't yet met Paula Bowen or Tina Terriault, they are our educator coaches through the ASaP Program (Access, Support and Participation). This is a fantastic program that partners with licensed childcare centers, to build educators' skills to ensure meaningful participation by all children. These ladies are knowledgeable and experienced, they provide us with resources and ideas, and have access to many resources for parents as well. Check out the "Backpack Series" binder in the front entrance if you're having any challenges with your little one!

Important dates this month:

November 16 – Red Day

NEW SYMPTOMS LIST FROM AHS:

The changes to the symptoms list do not mean that your child can attend daycare with a runny nose. **Children must still remain at home with any symptom.** For new onset or worsening fever, cough, shortness of breath, or loss of sense of taste or smell, the child must isolate for 10 days and may return after that as long as symptoms are gone. For other symptoms children must stay at home and be monitored for 24 hours. After the 24 hour period they may return as long as they are symptom free. Our regular childcare wellness policy is still in effect even as Covid restrictions are relaxed.
